Miami International Airport (MIA) is a primary large hub commercial service airport operated by the Miami-Dade Aviation Department and owned by Miami-Dade County. The airport is located eight miles northwest of downtown Miami and offers four runways, the longest of which (Runway 9-27) measures 13,016 feet long by 150 feet wide. MIA is served by 90 air carriers providing nonstop service to over 150 destinations worldwide, including more flights to Latin America and the Caribbean than any other U.S. airport. In 2021, MIA ranked number one in the U.S. in terms of international freight and passengers and is responsible for 60 percent of all international visitors into Florida.

The airport is a gateway to the rich cultural and natural attractions of south Florida, including major events such as the Art Basel global arts exhibition, Miami International Boat Show, and national sporting events. To meet growing demands associated with passenger and cargo activities, Miami International Airport continues to invest in its terminal, cargo handling, airside, and ground transportation facilities. The volume and breadth of activities supported by MIA coupled with capital investments to preserve and expand the airport drive the massive economic impacts generated by MIA.

Runway 8R-26L: 10,506' x 200'

Runway 12-30: 9,360' x 150'
Runway 8L-26R: 8,600' x 150'

Overview of the FASP 2043 Update:

Per Florida statute, the Florida Aviation System Plan (FASP) is periodically updated to summarize the airport and aviation needs in Florida while remaining consistent with the goals of the Florida Transportation Plan (FTP). The FASP 2043 Update focuses on reviewing the applicability of the various goals, objectives, and performance measures to support two primary goals: 1) provide for more efficiency in decision making within FDOT to support funding and development decisions, and 2) provide airports within the system with recommendations for development that support their individual missions while contributing to the overall strength and health of the Florida airport system.
